

HIGH TRANSPARENCY

100% MONO

RECYCLED MATERIAL

Widths
from 500 - 950mm

Strengths
from 250 - 1000µm

WHY PET film from silver plastics® ?

- ✓ Best product presentation through high transparency
- ✓ Excellent thermoforming behaviour
- ✓ Highest protection through A/B/A film construction
- ✓ 100% recyclable mono-PET 🌿
- ✓ Up to 80% recycled material use 🌿
- ✓ Also available with high barriers

OUR EXTRUSION

- ✓ With silicone coating or antifog on request
- ✓ Laminating unit with corona pre-treatment
- ✓ Automated film thickness measurement
- ✓ Inline IV measuring device

OUR FOIL

After intensive research and development, we were able to find a recyclable PET material for the A-layer in our film structure. We have been able to generate a recyclable PET material with optimized sealing properties.

With the help of this special mono-mixture we are able to provide our film with a safe, fast and effective sealing.

In the B-layer we offer up to 100% PCR material, 100% regrind, 100% virgin or various mixing ratios.
