

Backing Boards in a vacuum bag Flexible, Innovative and Simpel

Customers tend to base their buying decision on the visual appearance of the packaging. In general transparent packaging is preferred.

An appetizingly arranged product on an XPS Backing Board placed in a vacuum bag leads the eye directly to the product.

Fresh and highly sensitive foodstuffs need hygiene and protection.

Vacuumpackaging enables a long shelf lives due to the extraction of Oxygen

Due to the high vacuum, the barrierfilm- based- bag nestles towards the product. This then leaves no more space for oxygen-loving microorganisms.

Thanks to XPS backing boards the stability and the attractiveness of the pack is enchanced

The convenient and user friendly, colourful and printable product base

is packed into the vacuum bag. Inpack-Promotions, Spices or recipes can now be easily integrated.

If needed, the XPS Backing Board is able to absorb passiv product leakage.

The Vacuumpackaging can be placed both horizontally or hanging (Euro- Hole)/ standing vertically to present the product at the POS

Using modern user friendly and space saving vacuum machines, the high- performance vaccumbags (with or without shrinkback) can be closed tightly.

XPS Backing Board + Bag + vacuum machine = Top Vacuumpackaging!

Benefits

Vacuummachine

- More fresh, regional products
- Less personell and costs
- prolonged shelf- life
- fast and flexibel service
- less waiting time for customers
- larger Ø-Turnover per kg

XPS Backing Boards

- Dimensionally stable with a thickness of 5 mm
- no absorber pad necessary
- fully printable via lamination
- vertical and horizontal display possibilities
- controlled absorbency
- 0,08 % residual oxygen
- 60 % lighter than carton
- innovative After-Sales-Marketing
- passiv suction, avoids drying of the product
- Hygienic, Food Approved
- No Mineraloil Migration

Vacuumbag

- fully printable
- available with Euro-Hole
- vertical and horizontal display possibilities
- space saving, lightweight
- Hygienic
- barrier- funktion
- tearproof if in contact with bones or sharp products
- approved for all foodstuffs
